

Access systems

bebarmatic®

Radio code

Features

- Combination of pin code and radio tele-control
- Permanently installed radio station in columns, turnstiles etc.
- Ultra-compact access control system based on a radio tele-control system which can be operated like a pin code.
- Access authorization by inputting a 4 - 6-digit secret number
- Quartz-controlled digital transmission at the 433 MHz band
- Constantly changing code (rolling code) for highest security requirements
- Housing of impact-resistant ABS plastic
- Individual locking possible
- Simple programming at the place of use
- Range depending on the building environment up to 50 m
- No cable connection necessary
- Type of protection IP 57

Applications

Installed as a radio controlled station at:

- Pillars
- Entrances
- Turnstiles
- Etc.

Alternative

Radio tele-control system standard:
RC (rolling code) 433
